# Transbond™ XT
## Light Cure Adhesive

Transbond™ XT Light Cure Adhesive bonds metal and ceramic brackets to tooth surfaces. Available in both syringes and capsules, this adhesive uses light cure adhesive technology to provide you with additional working time to ensure accurate bracket placement.

The viscosity of Transbond XT adhesive was designed to prevent adhesive run-on and bracket skating that saves you money and reduces adhesive waste. 3M's adhesive-filled capsules and dispensing gun also provide for easy application, increased control and convenience. A syringe delivery system is available too. Best of all, the Transbond XT adhesive's quick cure provides for immediate archwire tie-in so your patients and staff can experience shorter bonding appointments.
