Introducing 3Shape TRIOS MOVE

3Shape spoke to more than a hundred dentists and identified their biggest problem; having the screen in the right place to show patients their teeth and the treatment needed.

We used this insight to create an ergonomic solution that ensures the screen is always in the right place to engage, excite and drive treatment acceptance with patients.

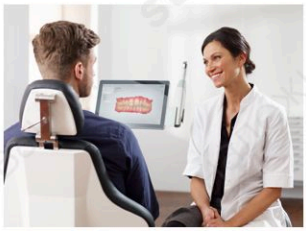

MOVE is the ultimate tool for patient excitement

Show

Facilitate dialogue

Increase acceptance

"3Shape TRIOS MOVE is visualization, patient communication and treatment planning on a whole new level."

Dr. Niklas Kreutzmann
Hobro, Denmark

Apps designed to excite
Drive treatment acceptance with TRIOS Patient Monitoring*, TRIOS Smile Design and TRIOS Treatment Simulator*.

Adjustable arm
Bring the screen directly in front of the patient to involve them in the scanning process and the treatment planning.

13.3" HD LCD Touchscreen
The perfect size when having it in front of a patient or working with up close.

Powerful custom PC designed for scanning
Specifically designed for use with all TRIOS 3 scanners to give a fast and smooth scan experience straight out of the box.

Four wheels with integrated brakes
It is now very easy to move around the chair and from chair to chair.
