# Stools That Support Healthy Posture.

A-dec 500 stools were designed to conform and move with your body. Take the dynamic seat for example. Everything from the suspension frame to the flexible, body-conforming materials are there for a purpose. Comfort. Easy-to-access paddles complete the customization and help you maintain ergonomically healthy posture throughout the day.

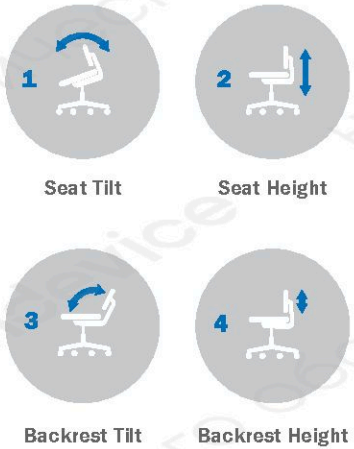

## Healthy Seated Posture

standard seat dynamic seat

Our answer to your ergonomic needs begins with adjusting the way you sit to avoid a damaging C-shaped spine. This healthy sitting posture is referred to as an "athletic stance." When you sit with hips above the knees and the backrest raised low and forward, your spine is able to maintain a healthy S-shape. The dynamic seat lets you enjoy both comfort and improved performance.

## Four Points of Adjustability

Seat Tilt Seat Height

Correct posture reduces stress on joints and spine, and provides better circulation for feet and extremities. A-dec 500 stools have easy-to-follow numbered paddles that encourage incremental customized adjustments throughout the day—especially important if there are multiple users.

## Dynamic Seating System

**Three layers of flexible seating conform to your every shift and move:**

1. **Cushion Foam** (top layer) - Forms a final tier of comfort.
2. **Comfort-flex Armature** (middle) - Creates a body-conforming surface, based on four performance zones.
3. **Flex Frame** (base) - Supports large scale movements.

## Dynamic Support

Our feature-rich A-dec 500 stools have a dynamic seating system with unique performance zones that mold to the shape of the body. These performance zones work in unison to keep you supported while you shift, lean and work. Other features, such as the contoured backrest, cradle the spine for ultimate comfort. With A-dec's ergonomic seating solutions, you can focus on what's most important—your patients.
