SIMPLE AND PRECISE !

anthogyr's range of endo contra-angles provides practitioners comfort and safety for successful root canal treatment.

The micro head offers maximum visibility and excellent access in the molar area.

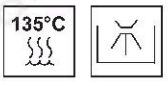

Thanks to its adjustment ring, the NiTi CONTROL® allows **precise torque control** and thus, avoids files breaking.

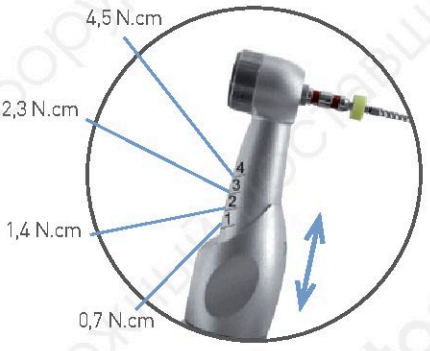

Applicable to all standard nickel-titanium file systems.

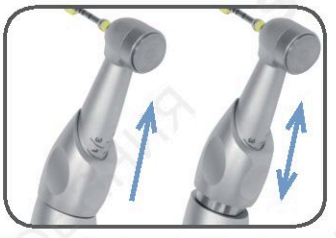

MAIN ASSETS

- **Durability** thanks to the chrome coating, which improves the resistance of the material.
- **Micro head** for better visibility and better access to the area to be treated.
- **Impeccable maintenance** thanks to an even surface which avoids the retention of bacteria.
- **Quick setting-up of the tool!** Insertion of the file without pressing the push-button.
- **Optimal safety** - NiTi CONTROL®: the automatic declutching function avoids files breaking. Easy and precise adjustment of the torque. Patented system.

Easy adjustment of the torque

	MICRO NiTi® Micro head push-button	MICRO NiTi® Latch type head	NiTi CONTROL®	Motor speed required for the files : 300 - 350 rpm	Motor speed required for the files : 600 - 650 rpm
