INNOVATION MEETS TRADITION

Production has become Asa Dental second nature from the very beginning.

Bucking a worldwide trend of decentralized production, we have decided to concentrate the entire manufacturing in Italy and guarantee our clients with the unmatched quality they deserve. The strict control over the whole production processes of disposable products and stainless steel instruments translates into a constant improvement of product quality and operational efficiency.

Each production plant focuses on its core competences, allowing employees to increase expertise and processes to be optimized. Regardless of the product, we can keep on responding to constantly shifting markets, whether in terms of quantity, quality or application.

With hundreds of thousands of products delivered every year, uncompromising quality testing and absolute traceability of products guarentee qualified denstists that every single product they use delivers all the necessary effectiveness, safety and comfort their patients demand.

ASA DENTAL
MAKE PEOPLE SMILE

DIAGNOSTIC

MADE IN ITALY

EMPOWERING DENTISTS TO MAKE PRECISE AND ACTIONABLE DIAGNOSIS

The ultimate goal of dental care is to assist in the lifelong maintenance of a dentition that is functional, comfortable and aesthetically pleasant. It all starts with a reliable diagnosis that can be clearly and effectively communicated to the patient. For this reason, we designed our diagnostic instruments selecting those materials offering the ideal trade-offs between precision, elasticity, ergonomics and durability, with different emphasis depending on the scope of the tool.

Cotton and dressing pliers

0600-2
Antimagnetic and easy to clean, these pliers
are comfortably light and efficiently durable.
Shape and angles make them ideal
for any situations, even the most complicated.
Thanks to an anti-adherent coating,
they can be used to place temporary filling materials.

ASA DENTAL
MAKE PEOPLE SMILE

ORAL SURGERY

MADE IN ITALY

ALL THE NECESSARY SURGICAL PRECISION

As a dental professional, you know that the more a procedure is invasive the clearer your communication with your patient must be. Answering questions like “How complicated it is?”, “How long will it take?” and “What could go wrong?” becomes as important as the intervention itself. Your job includes explaining the patient that the combination of your unique skills with the precision our instruments ensures the optimal outcome in the shortest time. We know that, and we answer the call of professionals like you asking for ergonomic instruments reliable over time and use that help reducing complexity and preventing complications.

ASA DENTAL
MAKE PEOPLE SMILE

EXTRACTIVE SURGERY

MADE IN ITALY

FIX IT NOW BUT THINK LONG TERM

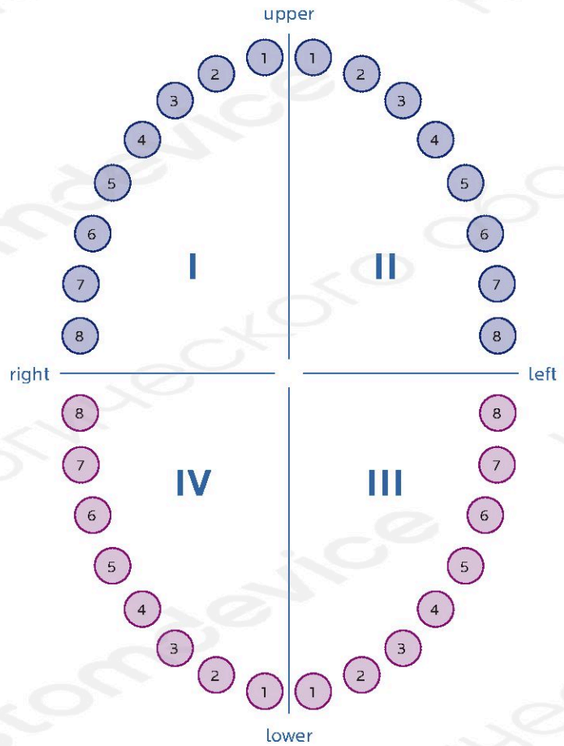

Removing a tooth is always an extreme measure, most of the time supposed to solve a painful situation for the patient. Even the simplest extractions demand the most careful manoeuvres, aiming at preserving the bone as much as possible without compromising the possibility of future implants. Yet, both your experience and medical literature tell you that there are cases demanding for procedures that are far more complex. A molar broken off at the gum line, an included or semi-included wisdom tooth, a non-erupting molar: the extraction turns into a real surgery with the necessity to create an access through the gum and minimize the amount of sacrificed bone. Being minimally invasive and extremely precise requires you a broad range of superior performance instruments, including a large variety of tooth-dedicated levers to address any type of intervention. This is what you find here.

Extracting forceps for roots

serrated tips

0101-1
Witzel extracting forceps are pliers handle versatile instruments that can be used for extraction of both teeth and roots.
The serrated tips, the curved jaw and the slim profile make them effective on roots, preventing unwanted fractures.

autoclave instrument protection lubrificant

Best instruments' autoclaving protection.
Penetrates and lubricates all instruments' joints. Protects all dental and surgical hand instruments before and after sterilization.
Instructions for use: oil all tips, joints and fastening of instruments before and after sterilization.

Steril Oil
40 ml
8002

Specific lubricant for dental and surgical instruments. The lubricant is designed to lubricate joints of all dental instruments (scissors, haemostatic and extracting forceps, bone rongeurs, needle holders etc.). Before and after sterilization it does not dry out during sterilization. Provides protection from corrosion and other deposits and ensures proper operation of the instruments.

IMPLANT SURGERY

MADE IN ITALY

FROM LOSS TO RECOVERY

In the last decade, implantology has become an important part of clinical practice, helping dentists to improve the quality of life of many patients. Whilst implant treatment could often be a convenient alternative to conventional treatment options, in certain cases, it is the treatment of first choice for the rehabilitation of severe functional, anatomical or aesthetic problems arising from tooth loss. Asa Dental has developed a number of highly functional and easy to use instruments to help qualified dentists tackle even the most challenging clinical cases effectively and fully deliver all the advantages patients can benefit from Implant Surgery, including high stability, preservation of alveolar bone and long-term results. Our proficiency with design and manufacturing has led to educational collaboration with major dental institutions to grow competency in this branch of dentistry among dental professionals.

ASA DENTAL
MAKE PEOPLE SMILE

RESTORATIVE

MADE IN ITALY

MAKE PEOPLE SMILE

This simple yet powerful idea drives every decision we take at Asa Dental. Whenever we choose materials, technologies, designs or manufacturing processes we make sure they will help dental professionals make people smile, anywhere in the world. Our Restorative instruments are first the result of a mindset, only after advanced technologies and skilled hands shape them.
This is how we manufacture durable excavators, precise carvers, effective burnishers, innovative isolation instruments and all the other products that allow the best practitioners to deliver aesthetically and functionally superior results.

ASA DENTAL
MAKE PEOPLE SMILE

PERIODONTAL

MADE IN ITALY

THE CUTTING EDGE

At Asa Dental we know that every professional cares the most about two things: clients' satisfaction and time. Hence, manufacturing instruments that guarantee the best results in the shortest time have become our number one motivator. We use cutting edge technologies to obtain cutting edge periodontal instruments, and we explore any possible design to give them the necessary shape, handle and size options. Sharp, durable and resilient to resist time and use.

Periodontal pocket Probes

Easy and fast to clean, they guarantee maximum precision.
Depth markings resist to the most stressing conditions, including temperature and chemicals, to maintain performance over time and use.
The ergonomic handle is designed to transform the instrument in the natural extension of your hand.

- New marking process
- Laser system marking
- No more paint peeling off
- Permanent marking
- Antiglare, low depth marking
- Maximum tip resistance against breaking

ASA DENTAL
MAKE PEOPLE SMILE

ORTHODONTIC

MADE IN ITALY

MAKING THE RIGHT ADJUSTMENTS

A packed agenda that gets usually busier after school time, lots of young clients and and many opportunities to positively contribute to healthier mouths and more pleasing appearances. This is your day as an orthodontist, a flow of 10 to 30 minutes appointments whose difficulty hugely varies, from routine alignments to complex detached braces or painful shifting of the arch wire. Regardless of that, you need reliable instruments that can help you perform confidently and effectively. Asa Dental offers two different lines of products. Premium instruments are dedicated to professionals demanding unrivalled quality and ergonomics in every situation, with all the other pliers and cutters offering the ideal trade-off between performance and convenience. We believe in quality outcomes but we also believe in dental care accessible to everyone.

Cutters

micro-miniature wire cutter
5833

Ultra slim profile soft wire cutter for ligature wires.
Designed to enhance access in difficult areas.
Wire size: max. 0.30 mm (0.012")

micro-miniature wire cutter
5833-1TC

Same as 5833 with tungsten carbide inserts

wire cutter <= 0.9 mm
5880-1

Designed to cut wire pins and ligature wires,
it is strong enough to bend archwire ends after distal cutting.
Wire size: max. 0.9 mm (0.036")

wire cutter <= 1.5 mm
5880-2

Designed to cut wire pins and ligature wires,
it is strong enough to bend archwire ends after distal cutting.
Wire size: max. 1.5 mm (0.044")

Cutters

wire cutter <= 1.2 mm
5880-3TC

Designed to cut wire pins and ligature wires,
it is strong enough to bend archwire ends after distal cutting.
Wire size: max. 1.2 mm (0.044").
With tungsten carbide inserts

distal end cutter
5836

Distal end cutter with safety hold designed to cut hard wires
and hold the loose distal end, preventing damages
to patient oral tissue.
Wire size: rectangular max. 0.56 mm x 0.7 mm (0.022" x 0.028")
round max. 0.5 mm (0.020")

distal end cutter
5836-1TC

Same as 5836 with tungsten carbide inserts

micro distal end cutter
5837

Distal end cutter with safety hold designed to cut hard wires
and hold the loose distal end, preventing damages
to patient oral tissue.
Wire size: rectangular max. 0.56 mm x 0.7 mm (0.022" x 0.028")

the plastic cover is not autoclavable

- possibility to insert both turbines' and micromotors' burs, permitting to prepare a unique bur holder which contains all the necessary burs
- possibility to prearrange operative sets by color distinguished (on the market you can find bur holders with not less than 6 different colors), permitting to organize at most warehousing and timing of intervention and choice
- prevention by burs accidental falls due to upsetting of the bur holder, which means prevention by possibility of breaking or sterilize one more time burs, thanks to cross holes that you can find on the best silicon bur holders. AsaFresh is patented by Asa Dental

IMPRESSION TRAYS

MADE IN ITALY

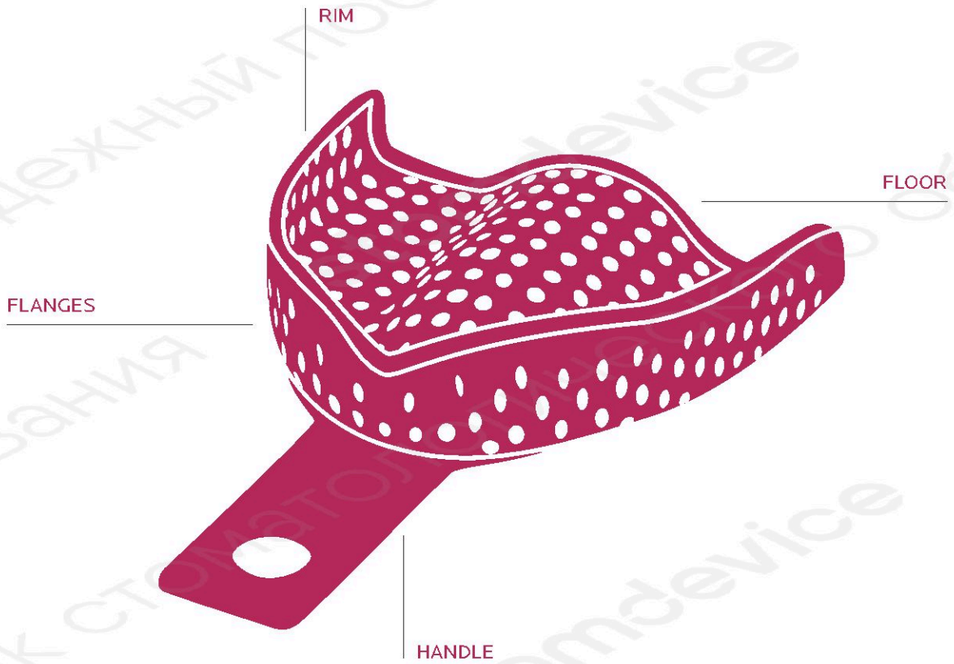

FIRST IMPRESSION

Many professionals consider impression trays simply as carriers for impression material rather than an important component in the treatment program. Therefore, they under estimate the importance of a correct choice in terms of size, shape, material and dimensional accuracy. Choosing the wrong size or the incorrect shape usually lead to inadequate impression taking: restorations and prosthesis can prove to be ill-fitting, asking for additional time of your work and more costs for your patient. Asa Dental impression trays come in different shapes and materials, with a convenient colour indexing for easy size selection, and all the necessary dimensional accuracy that proves them a key factor for the perfect outcome.

MAKE PEOPLE SMILE

LABORATORY INSTRUMENTs

MADE IN ITALY

SKILLS AND TOOLS

No matter how good a dentist is, in order to work the magic and transform impressions into successful dental prostheses, a behind-the-scene activity from a qualified dental technician is fundamental.
Based on detailed prescriptions that include anatomical information, your job as a technician is to combine a mix of technological expertise, artistic skills, state-of-the-art materials and precise instruments to carefully create crowns, bridges, partial, removable and full dentures and more.
Asa Dental Laboratory instruments range from highly versatile articulators to precise carving instruments, through a wide range of accessories; all necessary to shape materials and make sure you can confidently help dentists restore both function and aesthetics of a patient's mouth.

ARTICULATORS
average values

5050 and **5050Plus** are non-Arcon average value articulators designed to help dental technicians meet dentists' requests for high precision regardless of the prosthetic technique. A light, stable and ergonomic construction facilitates set-up and work on any models. Additional features guarantee an exact simulation of the condylar path with a high fitting accuracy, giving prosthesis and restorations the necessary occlusion and function throughout the full range of mandibular movements.

5050 can conveniently work with dentures of many different sizes and any electronic pressure polimerizers available on the market.
Designed to obtain optimal ergonomics, it offers complete stability when the technician comfortably works at 60° or upside down, in case of class III edentulous patients. The anti-rotational system for the incisal rod ensures that positioning is always correct and accurate, while the back blocking systems allows removing the rod and conveniently working on incisors. When the technique requires starting from one of the upper arches, the mounting plate helps regardless the size of the arch with clear indication of elliptic references.

FEATURES
- stable 60° operation for technician comfort
- ideal for class III patients
- compatible with any pressure polimerizers
- anti-rotation system for incisal rod
- template with 4 elliptic references for lower arch models
- occlusal table with 4 elliptic references for upper arch models
- bearing rod for 180° opening
- hinge rod with anti-shock protection system

TECHNICAL DATA

intercondylar distance	110 mm
condylar inclination fixed at	30°
Bennett angle	0 - 7°
incisal table inclination	10°
distance between mounting plates	87 mm
opening	180°

EQUIPMENT

4 mounting plates	5000-1
2 locking knobs	5011-6

5050

ARTICULATORS
average values

5050Plus is the most versatile articulator that complements Asa Dental laboratory instruments. **5050Plus** is available as a standalone product or as an upgrade of **5050**, with the addition of few accessories. Offering all the standard features of **5050**, with a dedicated mounting plate the articulator becomes the ideal solution for all the techniques based on building the prosthetics on lower arches while a magnetic incisal rod safely prevents undesired alteration of the model during cast solidification. Simple, accurate and ergonomic, **5050Plus** represents our best solution for dental technicians asking for a flexible and reliable average value, non-Arcon articulator.

FEATURES
- stable 60° operation for technician comfort
- ideal for class iii patients
- compatible with any pressure polimerizers
- anti-rotation system for incisal rod
- total stability when working without incisal rod
- template with 4 elliptic references for lower arch models
- occlusal table with 4 elliptic references for upper arch models
- magnetic incisal rod for total stability
- bearing rod for 180° opening
- hinge rod with anti-shock protection system

ARTICULATORS
average values

lightweight anatomic articulator made of aluminum die-casting;
it can be used following the geometrical laws of medium values (Bonwill triangle);
fixing according to centric;
automatic return to the hinge axis with springs;
anti-shock hinge rod in case articulator falls accidentally;
bigger size lock screws for mounting plates;
anatomic back shoulders favour a practical and efficient holding of the articulator

FEATURES
- increased height and width
- more space when using removable stumps systems
- more space for installation of mobile prosthesis with high chewing or big base
- more space when using magnetic plates
- better back entrance
- variable internal working distance
- incisal guide rod and bearing rod for 180° opening are in stainless steel
- stainless steel hinge rod
- anti-shock protection system
