

Destroy syringe body

Syringe Destroyer BD-300B

Feature:

Rechargeable battery, can working under AC or DC power source;

Low voltage electric shock can melt the needle instantly; mechanic cutting can melt syringe body, double super heating protection is provided;

Surplus liquid in the syringe can be vaporized and no pollution is generated;

Indicator light sparks during melting, showing the needle is under destroying, the whole process is finished in 1 to 3 seconds.

Destroy Needle specifications 18G—34G

Specification:

Power: AC 110V±10% or 220V±10%; DC 6V

Melting method: melt with low pressure, high temperature; mechanic cutting of the body

Melting efficiency: take 20ml syringe body as reference, can melt syringe (Φ1.2тт length 35mm) approximately 3 seconds; destroy the body within 4 seconds;

Working time: can destroyer around 240 continuously (take 20ml syringe body as reference)

Working noise:<50 dB

Electrode chip working voltage: AC 8V

Power: <130VA

Electrode chip super heating protection temperature: 85°C

Add: 8/F, Yi Fang Building, No.315 Shuang Ming Blvd, Guangming Dist., Shenzhen, P.R.China (Factory)
