Polus® Advanced Ultra Whitening Accelerator

The BEYOND® Polus® Advanced Ultra is a feature-expanded version of our award-winning Polus series of whitening accelerators. In addition to the features that BEYOND customers have grown to know and love, the Advanced Ultra has an augmented ultrasound function that lets the practitioner reduce the treatment time while maintaining the same great results.

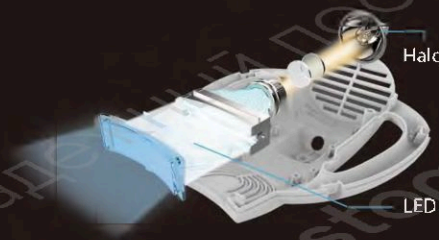

Our powerful halogen light source is filtered by two sets of 30 optical lenses, then transported via over 200,000 optical fibers to add with our LED light source. As this light accelerates the chemical breakdown of the whitening gel, the patent-pending ultrasound function utilizes a cavitation process that agitates and permits the whitening gel to target the enamel more comprehensively and in a shorter time frame. This means less chair time for the patient, less potential for sensitivity and the same great results you've come to expect with BEYOND.

Innovative and Power-Packed System

- Upgraded light filtration system containing over 200,000 optical fibers, to filter out all harmful heat and ultraviolet (UV) light
- Combines high-intensity halogen lamps, medical LED lamps and ultrasonic generators to form a composite activation source of hydrogen peroxide
- Dual-arch power whitening option can be set to High, Medium, or Low light output settings for a tailored treatment that best suits each individual patient
- Single-tooth whitening option included for precision, tailored treatment results
- Smart Remote Control that allows patient awareness of procedure time
- Built in purifier for a cleaner and healthier environment
- Built-in instruction mode, that allows for a customized whitening procedure based on the client's needs
- Built-in, powerful LED curing light features a dual wavelength output to cure any dental composite on the market
- State of the art, full colored, touch screen with newly added multilingual feature
- Advanced temperature monitor and cooling system to prevent system from overheating

stomdevice

Elegant – Chic and modern design that will be easily embraced by any dental practice.

Adjustable – Whitening option can be set to gentle, normal, or intense light output settings for a tailored treatment that best suits each individual patient.

Digital – Simple and quick patient preparation and system operation with digital display control board.

Purifies – Using negative ions, the built in air purifier reduces airborne pollutants that may exist within the practice, actively contributing to a cleaner and healthier environment.

When used in combination with BEYOND® proprietary whitening formula which contains hydrogen peroxide (H_2O_2) and silicon dioxide (SiO_2) that act as a catalyst, along with other special ingredients, the end result is not only whiter teeth but shinier teeth with reduced prep and chair time.

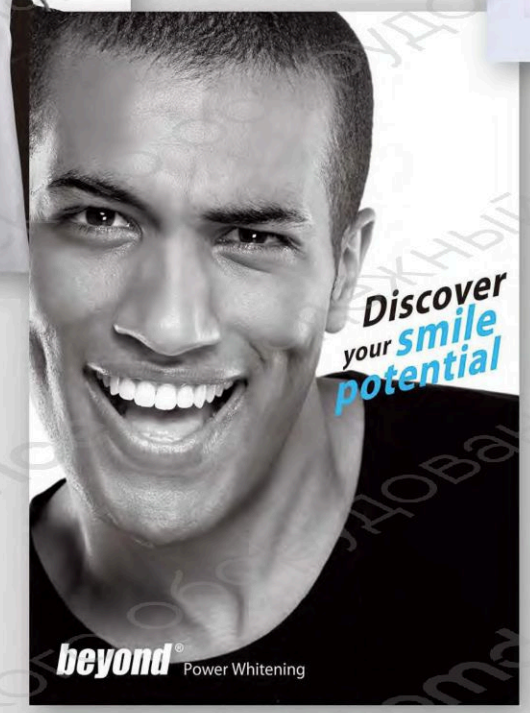

- The BEYOND® II is both lightweight and portable for both travel and ease of use for room to room
- Whitening options can be set to Low, Medium and High light output settings for a tailored treatment that best suits each individual client
- Quick and simple client preparation and system operation with digital display control board
- Utilizing negative ions, the built-in air purifier reduces airborne pollutants that may exist within the treatment space, actively contributing to a cleaner and healthier environment

Rebuild, Strengthen, and Whiten Formula

The BEYOND® Max5® Solution Treatment Kit is a revolutionary new product, combining our most popular in-office teeth whitening kit and a specially formulated RS gel to reduce known sensitivity of some patients. This kit includes our same dual-barrel syringe W Gel 1 with 35% hydrogen peroxide (H_2O_2) and our specially formulated RS Gel 2 that contains desensitizing ingredients. This combination of potassium nitrate and hydroxyapatite offers enamel regeneration and restoration. When combined, the strength of both gels reduce the hydrogen peroxide concentration to 6% and helps aid in the reduction of sensitivity, as well as remineralization of the enamel. This kit includes the essentials for chairside teeth bleaching of five patients. A typical treatment is three consecutive cycles of 15-20 minutes each, combined with light acceleration. Using the RS gel alone enables patients to overcome any hypersensitivity in a very short time after treatment and does not require the use of the accelerator. The result is excellent whitening results coupled with little to no sensitivity for those undergoing the treatment. **FOR BEST RESULTS, USE WITH BEYOND® ACCELERATOR.**

BEYOND® MAX5® Solution Treatment Kit

- Features our popular 35% H_2O_2 W Gel 1 formula whitening gel
- Our specially formulated RS Gel contains special ingredients to reduce the risk of sensitivity
- The combination of the two gels rebuilds, strengthen, and whitens tooth enamel
- Gel's proprietary formula improves oral health while whitening
- Produces dramatic glossy, white results
- Clinically proven results

Package Contents

- 5 Dual-barrel syringes of Max5 Solution W gel (2.6g/2.2 mL)
- 5 Mixing tips of Max5 Solution W gel syringe
- 5 Pouches of Max5 Solution RS gel (11g/9.5mL)
- 5 Spatulas
- 5 Brushes
- 5 Mixing jars
- 5 Face protection cloths
- 5 Vita shade guides
- 5 After-treatment guides
- 1 Instruction manual

BEYOND® SOLO® Solution Treatment Kit

- Features our popular 35% H_2O_2 W Gel 1 formula whitening gel
- Our specially formulated RS Gel contains special ingredients to reduce the risk of sensitivity
- Gel's proprietary formula improves oral health while whitening
- Produces dramatic glossy, white results
- Compact packaging, economical and practical
- Individualized packaging for single patients

BEYOND® Solo® Solution was created with patients with known cases of sensitive teeth in mind. Solo® Solution consists of a W Gel of 35% H_2O_2 dual barrel syringe, which is then mixed with a RS Gel that contains known desensitizing ingredients such as potassium nitrate and restoring ingredients such as hydroxyapatite. This reduces the concentration of hydrogen peroxide to below 6% and helps aid in reduction of sensitivity as well as remineralization of the enamel. The result is excellent whitening results coupled with little to no sensitivity for those undergoing the treatment. **FOR BEST RESULTS, USE WITH BEYOND® ACCELERATOR.**

Package Content

- 1 Dual-barrel syringe of Solo Solution W gel (2.6g/2.2 mL)
- 1 Mixing tip for Solo Solution W gel syringe
- 1 Pouch of Solo Solution RS gel (11g/9.5mL)
- 1 Face protection cloth
- 1 Spatula
- 1 Brush
- 1 Vita shade guide
- 1 Instruction manual
- 1 After-treatment guide

Special Designed Formula For Tetracycline and Severe Stains

BEYOND® Blast® Solution was created with patients with known cases of severe or tetracycline stains in mind. Blast® Solution consists of a W Gel of 35% H_2O_2 aqueous solution, which is mixed with silicon dioxide catalyst powder into a wet paste. The paste is then mixed with a RS Gel that contains known desensitizing ingredients such as potassium nitrate and restoring ingredient such as hydroxyapatite. This reduces the concentration of hydrogen peroxide to below 6% and helps aid in reduction of sensitivity as well as remineralization of the enamel. The result is excellent whitening results coupled with little to no sensitivity for those undergoing the treatment. **FOR BEST RESULTS, USE WITH BEYOND® ACCELERATOR.**

BEYOND® Blast® Solution Treatment Kit

- 35% hydrogen peroxide manual-mix whitening paste
- Our specially formulated RS Gel contains special ingredients to reduce the risk of sensitivity
- Formulated to reduce the appearance of difficult and severe stains
- Effective pre-treatment whitening boost for tetracycline and fluoride stains
- For use with any BEYOND® Whitening Kit or light system
- Individualized packaging for single patients
- Clinically proven results
