Who are we?

About US

BOMEDENT

is a high-tech enterprise, focusing on researching, ***developing and manufacturing of dental instruments.***

The R&D team has 12 years experience in small dental device development.

Highly experienced engineers keep constantly innovating to ensure the products remain at the forefront in dental area.

2月28日 上午10:30

Are yu with bomedent

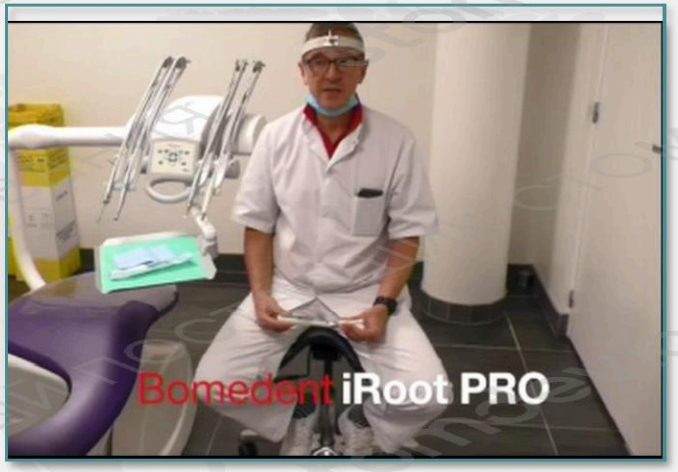

yes, of course

Your endomotor and apex locator is very good.

Many doctors like it

really,? so nice to hear that

very, very good info. Ok, I will be waiting. 下午6:45

Of course, our order for me is still valid (maybe, we can increase qty of some products) 下午6:45

Really? 下午7:30

Thank you so much 下午7:30

mhm, our customers are more then excited due to apex locator, and endo motor 下午7:30

Subject: Re: sample testing

Dear Anita,

The following week I started to use your endomotor and apex locator. The motor is incredibly "smart". It has all the functions that I have ever seen being built into an endomotor. It takes some time to try all the various functions as it requires certain types of cases as well.

I really like the function of the motor that automatically starts the rotation of the file when inserting it into the root canal and stops it when taking out. It saves me some time because I do not have to press the botton so many times.

I have tested the apex locator comparing the zero reading measurement of your apex locator to that of Morita Root ZX Mini, which I have been using for many years. They gave me the same result.

I find that in difficult cases (wide open apex or exsudating periapical tissues) the length measurement is reliable when I am able to move the file apically step by step proceeding beyond the apex and then back several times. That is why it is nice to see the steps beyond the
