History of DENTECH

In 1907, Dentech Corporation, a pioneering manufacturer in Dental Instruments, was founded in Yanaka, Tokyo by Kenjiro Kimura, and it was originally named as Kimura Kousakusho.

We manufactured the first Japan made dental burs.

After Second World War

In 1944, the first factory was destroyed due to Second World War.
In 1947, after the war, we transferred our factory to Itabashi in Tokyo and reconstructed it.
However, in 1954, the strongest ever typhoon unfortunately struck around the area and the factory collapsed again.
In 1955, we rebuilt a new factory at the place nearby the destroyed factory to continue providing our products for the customers.

First Advancement Overseas

After Second World War, a lot of dentists came to Japan from the U.S. accompanying the occupation army and needed trustworthy dental instruments with high quality.
Thus we were able to develop our products through the cooperation of them.
In 1971, we launched to export our products overseas and our first overseas customer was in the United States.

Renamed as DENTECH

Kimura Kosakusho was renamed as Dentech Corporation in 1974.
Since 1976 we have manufactured drills for implantology as the first implant drill manufacturer in Japan.
Nowadays most Japanese implant makers adopt our drills.

The Current DENTECH

Today Dentech is well known as one of the companies which have the longest over 100 - year history in dental industry.
KSK rubber dam instruments, implantation drills and burs as well as many unique products with Japan-made high quality are well supported by dentists and proffesionals all over the world.

DENTECH

Joint Performance with Japanese CRAFTSMANSHIP and Latest Machine Technologies

We possess CNC lathe, CNC Grinding machine, Heat treating machine, 3D CAD/CAM systems, and other various latest machines and equipments at our own factory in Japan. At the same time we are proud of the greatest technique by our craftsmen whose skill is unequaled with any others. We have an advantage in manufacturing extremely delicate dental/medical instruments using these two wheels which are identified by the machine automation and craftsmen's te-qunique.

We have been developing, designing and manufacturing any kinds of dental and surgical instruments needed in clinical site around the world with outstanding quality for over a century.

It is a great honor for us that our products are highly respected all over the world. Our products would surely satisfy you.

Dentech has been assessed and certified as meeting the requirements of ISO 13485.

MD 86287/ISO13485 2016

KSK Rubberdam system's products has verified for the European CE mark medical device regulation.

KSK Rubber Dam Clamps

132℃ 121℃

Features

- KSK Rubber Dam Clamps are made of specially selected and tempered stainless steel.
- Ideal spring action and high resistance against the corrosion.
- Various forms are available, so you can chosse clamps in accordance with the teeth.
- 4000 times open-close metal fatigue test goes for every production lot to assure long-term spring action.
- For stable forms, our craftsmen adjust bending every KSK clamps one by one manually.
- All beaks are sharpened for best fitting on the teeth.
- "MATT" and "BLACK" can avoid eye fatigue of dentists from reflecting operation light.

Finishing

GLOSSY
Glossy finishing.

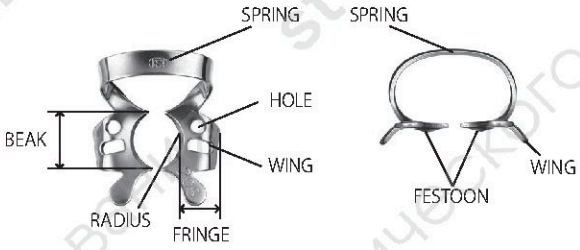

MATT
Sand blasted non glossy finishing.

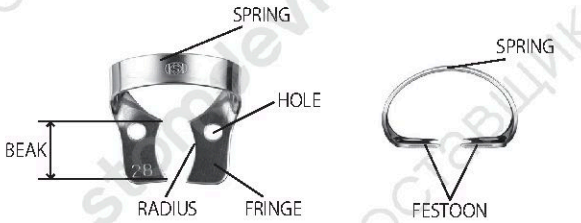

BLACK
Not painted, Oxide layer finishing which is safe for human body

Winged or Wingless

WINGED

WINGLESS

[Important Safety Instructions]

It is likely to transform and to break when force is excessively added.
Please do not expand rubber dam clamps more than the necessity.

Dental Dams

Dental Dams (Pure natural rubber)

Medium

Thin

Features

- KSK dental dams have a good resistance and elastic property.
- Packed in airtight aluminium bags to keep the rubber sheet fresh.
- "Thin" is made of color free material then capable for monitoring the condition of an patient during isolation treatment.

[Specification]
Packaging : 36 sheets / pack Size : 6"x 6" (152mm x 152mm)
Thickness : 0.20mm(Medium), 0.18mm(Thin) Color : Green(Medium), Ivory(Thin)
Scent : Non

Product Code	01023020
Product	KSK Dental Dam Medium (cut)6"x6"
Product Code	01023030
Product	KSK Dental Dam Thin (cut)6"x6"

Dental Dam Non-Latex

Features

- Used when there is a concern regarding an individual's possible allergic reaction to the proteins present in natural rubber.
- Packed in airtight aluminium bags to keep the rubber sheet fresh.

[Specification]
Packaging : 20 sheets / pack Size : 6" x 6" (152mm x 152mm)
Thickness : 0.20mm Color : Blue Scent : Non

Product Code	01023040
Product	KSK Dental Dam (cut)6"x6" Non-Latex

Dental Dam Non-Latex Powder-Free

Features

- Powder-free minimizes the risk of illness or injury caused by allergy for all dental health care personnel and patients.
- Packed in airtight aluminium bags to keep the rubber sheet fresh.

[Specification]
Packaging : 15 sheets / pack Size : 6" x 6"(152mm x 152mm)
Thickness : 0.25mm Color : Purple Scent : Mint

Product Code	01023050
Product	KSK Dental Dam (cut)6"x6" Non-Latex Powder-Free

Product Code	06092320
Product	New Inlay & Crown Setter S Set
Product Code	50050035
Product	New Inlay & Crown Setter, Extra Rubber Pads 2 pcs

※Replacement silicone rubber inserts 2pcs.

Tooth Separators

Elliot's Separator

132℃

Description

The pushing screw can be attached both right and left side.
Improved jaw design enable to be stable while pushing by the screw.

[Specification]
Material : Stainless Steel
Size : 37 x 67mm

Product Code	01071000
Product	Elliot's Separator

https://stomdevice.ru - стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

Tooth Separators

Ivory's Separator

132℃

Description

With improved curved jaw design, thus separators become stable while pushing by the screw.
It is applied in the front area of the upper and lower teeth.

[Specification]
Material : Stainless Steel
Size : 37 x 67mm

Product Code	01072000
Product	Ivory's Separator

Articulating Paper Holders

Articulating Paper Holder, M-Type

132℃

Description

It is made with milled in order not to move articulating paper and designed to be convenient for the operator.

[Specification]
Material : Stainless Steel
Size : 145mm

Product Code	06121000
Product	Articulating Paper Holder, M-Type

(The inside)

Articulating Paper Holder, Y-Type

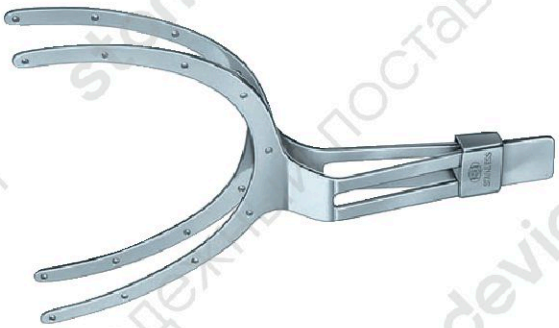

132℃

Description

Sure holding of Articulating papers by pins and holes.
Ideal to make for full dentures.

[Specification]
Material : Stainless Steel
Size : Large 74 x 60mm Small 66 x 48mm

Product Code	06122000

Twist Drills Black

132℃

Description

A surgical drill with increased abrasion resistance, corrosion resistance, durability and hardness with DLC coating.
It comes with a movable stopper which allows for the length of the drill to be adjusted and a dedicated wrench. The adjustment range for the stopper is between 6 - 11mm for short, and 11 - 16mm for long.

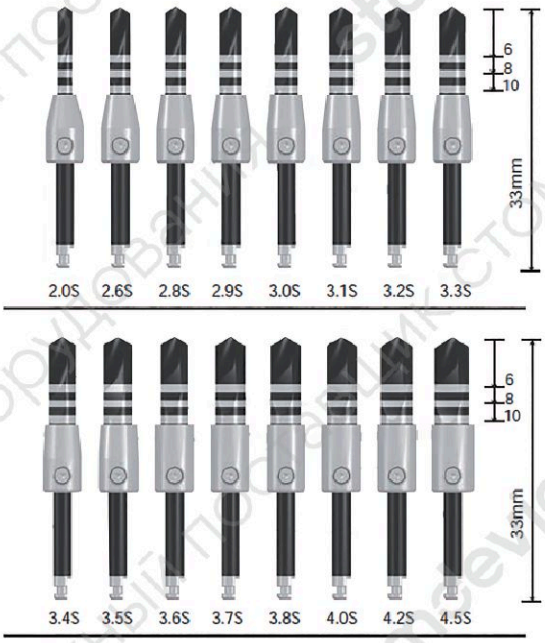

What's DLC?

DLC is short for "Diamond Like Carbon", and it is technology that coats a nano - level hard film with properties that resemble that of diamonds onto metallic surfaces. While having approximately 5 times the hardness compared to existing products, it has shown overwhelming low friction factor and it is recognized as the most technologically advanced among the many surface treatment techniques available.

[Specification]

Twist Drills

132℃

Twist Drills External Cooling

Description

Our drills are made of stainless steel with high carbon. It assures enough hardness, good cutting efficiency and long life. But rather weak for rust. Careful maintenance will be required to avoid rust and to assure along life.

Good maintenance

① Immediately after use, drills should be dipped into anti-rust solution.
② Stopper should be removed while cleaning and autoclave.
③ Blood and bones should be removed completely after use.
④ Use only refined water for autoclave.
⑤ Use drill stand while autoclave, do not put into sterilization bag directly.

Twist Drills Internal Cooling

Description

The drills with internal cooling system should be used also with external cooling. Drill speed should be controlled from 600rpm(thick drills) up to 1000rpm(for fine drills).
Cutting efficiency is coming bad by each use and bad drill will cause heat damages against bone. Only good drills should be used for operation. For very hard bones, it is recommended to use surgical burs prior to implant drills. Surgical burs will help easy drilling and long life. The fix screw of drill stopper is so small and it can not be bear a strong force. Drills can be used also without stopper.

Trephine Burs

132℃

Description

Trephine Burs do not have blade at center, thus it will be rather difficult to get smooth cutting for a start. Enough exercise is recommended before use. After Trephine Burs penetrate into bone, then smooth cutting is available. To avoid choking on bone inside Trephine Bur, pull of Trephine Burs up and down, so that bone will always remain at patient. Remained bone can be collected by surgical curettes. Enough cooling and possibly low speed is recommended to avoid heat damage against bone.

Technika TK Drill System

Description

Innovative dental drill for implant treatment.
Safe and Secure drill systems
Completed with a minimum 4drills, easy steps
Ultra-low speed rotation, no water injection
Autologous bone guide / Autologous bone collection

[Specification]
Contents : ① Surgical Bur Round 141RF/018
② Twist Drill Short 2.0S (External Cooling)
③ Technika TK Countersink (3.0, 3.5, 4.0, 4.5, 5.0)
④ Technika TK Drill (ϕ3.0, ϕ3.5, ϕ4.0, ϕ4.5, ϕ5.0
⑤ Technika Surgical Cassette *final drill is not included

Product Code	30120000	Product	Technika TK Drill System

①
Surgical Bur Round 141RF/018
Material : Stainless Steel
Length : 34 mm,
Size : ϕ1.8mm
Quantity : 1pc

③
Technika TK Countersink
Material : Stainless Steel
Length : 24 mm,
Size : 3.0, 3.5, 4.0, 4.5, 5.0
Quantity : 1pc each

②
Twist Drill Short 2.0S (External Cooling)
Material : Stainless Steel
Length : 33 mm,
Size : ϕ2.0
Quantity : 1pc

④
Technika TK Drill
Material : Stainless Steel
Length : 36 mm,
Size : ϕ3.0, ϕ3.5, ϕ4.0, ϕ4.5, ϕ5.0
Quantity : 1pc each

⑤
Technika Surgical Cassette
Material : Resin and Silicone
Size : 99.5 mm x 143 mm x 61 mm
Quantity : 1pc

● included drills

Implant Drill Checker

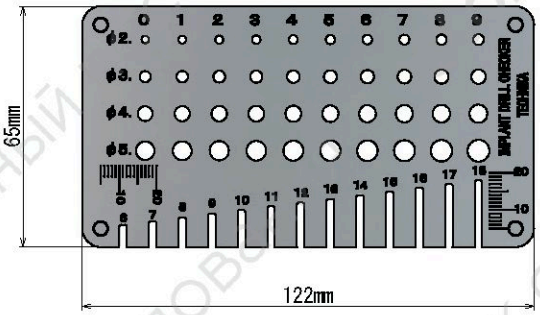

132℃

Description

Can be measured diameter of 2.0 - 5.9mm.
Can be measured length of 6.0 - 18.0mm.
With length scale of 5 - 20mm. Can be used for drill stand.

[Specification]
Material : Stainless steel

Product Code 30080012
Product Implant Drill Checker

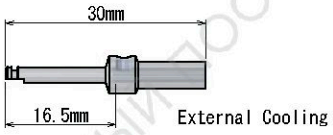

Drill Extenders

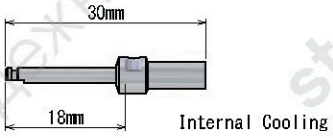

132℃

Description

Two types : External cooling/Internal cooling
Extension length : External cooling is 16.5mm,
Interna cooling is 18 mm.

[Specification]
Material : Stainless steel

Product Code 30080001
Product Drill Extension External Cooling

Product Code 30080002
Product Drill Extension Internal Cooling

Drill Extension SHORT External Cooling

132℃

Description

Can extend the drill length slightly 5mm.
Easy attaching without tools.

[Specification]
Material : Stainless steel Diameter : 7.7 mm

Product Code 30079991
Product Drill Extension SHORT External Cooling

Para Drill Aid II

132℃

Description

- Attachment drill aid for parallel implantation.
- Four guid - pins and three drill - sleeves make surgery better and shorter.
- You can easily make a hole for parallel implantation.
- Pilot drill (dia 1.8 to 2.0mm) is available.
- All parts are autoclavable.

[Specification]
Material: Stainless steel

Product Code	30080200
Product	Para Drill Aid II

Technika Bone Mill Set

132℃

Description

- Simple and compact
- Easy operating
  The angle mount enables easy and smooth operating.
- Easy milling
  The unique shaped cutter with DLC coating enable easy and fine milling.
- Easy assembling
  The simple structure saves time for operating and cleaning With sterization case and cleaning brush
  Cutter for substitute. ※sell separately

Product Code	30080015

Technika Repair Tap

Description

- For internal threads repair.
- Made of high corrosion resistant stainless steel compatible with autoclave.
- Long lasting DLC coating.
- Safe Handle

[Specification]
Material : Stainless steel (Tap and Handle)
Surface Treatment : DLC coating (Tap)
Thread Diameter x Pitch : M1.6 x 0.35 / M2.0 x 0.4
Made in Japan

Product Code	30011110	Product	REPAIR TAP M1.6 with Handle
Product Code	30011130	Product	REPAIR TAP M2.0 with Handle
Product Code	30011210	Product	M1.6 Tap only
Product Code	30011230	Product	M2.0 Tap only
Product Code	30011300	Product	Handle for Repair Tap

● Repair Tap with Handle(Basic Set)

132℃

● Repair Tap

For users having "Handle"

● Handle for Repair Tap

Compatible to both Tap

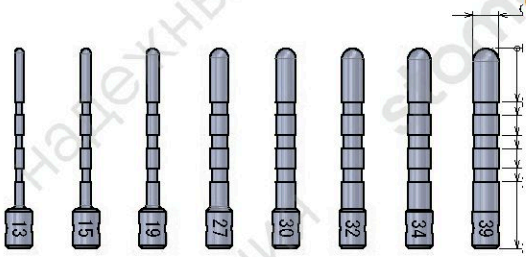

Depth Gauges

Description

Graduations on 8, 10, 13, 15, 18, 20.
Graduations can be exposed on X-ray film.
Diameter : 1.3, 1.5, 1.9, 2.7, 3.0, 3.2, 3.4, 3.9mm.

Gingiva Gauge

Description

The first division shows 1mm when top of measuring block and needle are coincide. Wide of graduation is 1mm and pitch is 2mm, thus each graduation shows the gingival thickness of 2, 3, 4, 5, 6, 7mm. Put the measuring block in right angle to gingiva, then prick gingival by light force until needle reaches to bone. Pull out carefully so that measuring block would not moves. Read the thickness at the back side of measuring block.

Product Code	30080013	Product	Gingiva Gauge

- Can be measured the thickness of gingiva from 2mm to 7mm in increments of 1mm during implant operation.
- For a more exact and detailed measure. It is better to use micrometer caliper separately.

Sterilization Box

<STOCK ONLY>

Description

● Sterilization Box
Can be housed three bur stands.

[Specification]
Material : Aluminum
Size : 170 x 70 x 30mm

● Sterilization Box

Bur Stands

Description

You can stand 6 burs.

[Specification]
Material : Stainless Steel
Bur Stand 40(w70 x D40 x H15mm) Compliant bur length : Max 35mm
Bur Stand 45(W70 x D45 x H15mm) Compliant bur length : Max 40mm
