FUSION™ S7 Curing Light

Powerful

Portable

Durable

Collimated LED Beam
10mm large tip size

Slim Ergonomic

Smart Indicator
Alarm and charging state

Easy Activation Button

Solid Metal Body
Sturdy anodized aluminum body
Shock-proof reliability
Weighs only 110 grams.

Smart Li-Ion Battery
Non-memory
Rechargeable
Replaceable

Charging Station
Solid metal table-top charge base
Options of dental unit mount charge holder

Actual Size

FUSION - Truly different from the rest of the crowd

Unsurpassed modularity, reliability, simplicity and functionality

1200 mW/cm² collimated beam

Order Information

7500080-S7S **FUSION S7 Curing Light System**
Including Multi-function Advanced Handpiece, Power Adapter, Charging Base, 100 Barrier Sleeves and 1-year warranty.

7500081 9mm Curing Caps (50/pk)
7500081B 13mm Curing Caps (50/pk)
7500081C 3mm Tacking /Exam Tips (20/pk)
7500082 Barrier Sleeves (100/pk)
7500083 Charging Stand
7500084-08 Battery Assembly
7500085 Power Adapter
7500085E Power Adapter (EU)
7500085UK Power Adapter (UK)
7500088 Eyeshield Safety Goggle
7500092 Eyeshield
7500093 Focus Lens Module
7500095 Lens Tool
7500050S S7 Control Module
7500060W White Light Module
7500060S S7 Standard Light Module
7500060U Violet Light Module
7500071 Dental Unit Charge Holder
7500072 Chair Power Extension

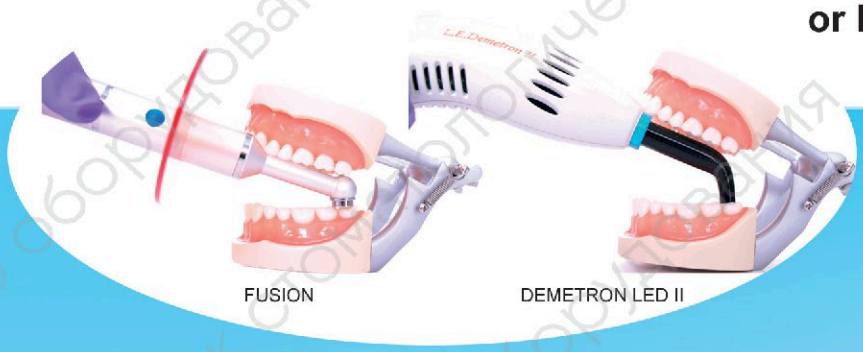

Interchangeable Light Head

DR. FRED A. RUEGGEBERG
"As a result of its low dispersion, FUSION shows the highest power density at 5-mm tip distance among 22 LED lights and provides more than two times the intensity of many other LED curing lights at 10mm away from the tip."
"A Clinicians Guide to Light Curing"
Academy of Operative Dentistry, Annual Meeting, Feb., 2007.

DR. GEORGE FREEDMAN DDS
"The FUSION from DentLight uses a patented light-generating technology to provide an outstanding clinical output. The light beaming technology significantly reduces the dispersion of light along its direction of propagation and narrows the angle of light diffraction, providing a concentrated and relatively wide curing spot. As composites with ever lower polymerization shrinkage properties are developed, the FUSION curing light may allow single-step bulk curing of these materials"
"First Impressions", May 2007, *Dentistry Today*

STEPHEN M. BURTON, DDS
"This letter is in reference to the product FUSION hand-held curing light, which is the finest instrument I have used in years. It is small, powerful, easy to use, and has been extremely dependable. The other thing that has been remarkable about this light is the depth it will go in the tooth structure. I have found the material harder set with this light."
Salt Lake City, Utah, 2006
