SURGICAL

New instruments in Implantology:

THE PPBUSER SCRAPERS

PROF. DR. DANIEL BUSER

PPBUSER.....

These scrapers permit the use of autologous bones. The scrapers have rounded corners and are available in the following widths:

PPBUSER12X	**4 + 5 mm**
PPBUSER13X	**4 + 6 mm**
PPBUSER23X	**5 + 6 mm**

PPBUSER12X

With this scraper it is possible to remove excellent transplantation material in suitable bone quantities.

ADVANTAGES:

- **Simple and rapid bone removal** reduces the stress on the patient, thus substantially alleviating postoperative complaints.
- **Optimal positioning of transplantation material:** It is often possible to remove bone in the immediate vicinity of the implantation site.
- **The high-quality blades** enable optimum cutting of the bone material into fine discs (lamellas) without exerting a great deal of pressure.
