Tight sealing of fissures with Helioseal® F Plus (Picture: M. Hauner, Ivoclar Vivadent AG, Liechtenstein)

Permanent molar before and after the application of Helioseal® F Plus.

Helioseal® F Plus

Protection for pits and fissures

Precise dispensing

Helioseal® F Plus is a light-curing, white-pigmented, fluoride-releasing fissure sealant. It comes in a syringe, which allows the product to be precisely dispensed and applied. With the fine tip the sealant is applied quickly and accurately without overfilling the fissure.

Excellent flow properties

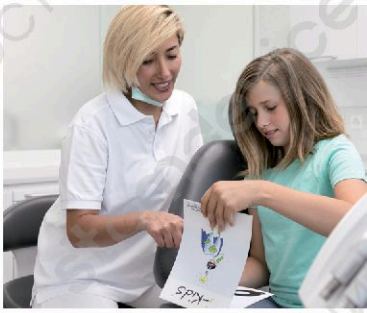

Helioseal F Plus is flowable and it is easy to distribute on intricate surfaces – even in the upper jaw. The tight marginal seal provides protection against cariogenic germs. Fine filler particles ensure a smoothly sealed surface.

Fast curing

With the help of an appropriate curing light, such as Bluephase Style or Bluephase G4, Helioseal F Plus can be cured in only ten seconds. Due to its short light-curing time, precise application and excellent flow and wetting properties, the sealant offers fast and efficient treatment in children and adolescents.

Helioseal® F Plus – The efficient fissure sealant

Advantages	Benefits
New formulation featuring optimized consistency	Optimum distribution on the intricate surfaces of pits and fissures
Precise dispensing and application	Efficient treatment
Reduced exposure time	Fast, comfortable treatment for children

Helioseal® F Plus deliver forms

Helioseal F Plus
Syringe containing
1.25 g

Helioseal F Plus
Cavifil containing
0.1 g
