Additional functions of sterilizers with UV-lamps

DEZAR

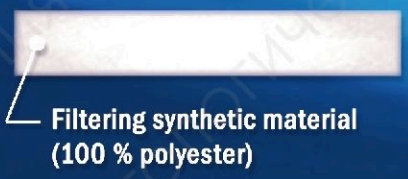

Национальный Реестр

Filtering of air flow

Particles more than 10 microns: dust, pollen, plant spores, mildew, fumes of sterilization liquids, sprays.

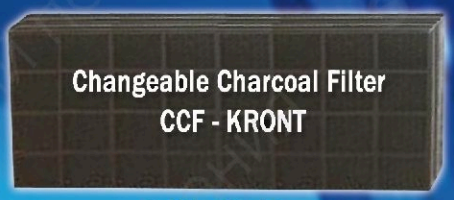

260x90x5 mm

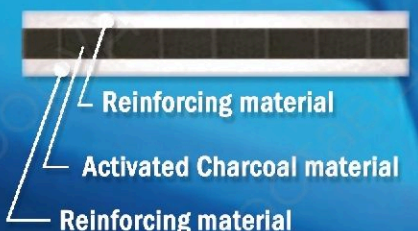

Clearance of air flow from toxic chemical admixture

Anesthetic gases, antibiotics, formaldehydes, ammonia, alcohols, hormone, washing, disinfection and sterilizing liquids, pair acids and alkalis, carbon oxide (CO) and nitrogen (NO) etc.

260x90x5 mm

Plug-in filtering block

Two strong fixing-catches allow installing plug-in filtering block on to trunk of sterilizer.

Filtering block consists of:

- security grid,
- air filter or combined charcoal filter,
- grid filter holding for fixing filter with 2 strong catch.

Do not need any tools for assembling and installing the filtering block and exchanging the filter.
