ULTRASONIC INSERTS

A LARGE VARIETY OF APPLICATIONS

Scaling, perio, endo, restorative – mectron offers a wide range of applications. mectron's high-quality technique guarantees optimal treatment power and utmost security in each single unit.

This remarkable quality is the result of the successful combination of fine electronic concept and a special tips design.

INSERT FOR IMPLANT CLEANING – MAXIMAL TREATMENT EFFICIENCY WITH THE HIGHEST PATIENT COMFORT

- tip IC1 – 100% PEEK (high tech plastics) – for the maximum respect of the implant surface
- the special shape of the tipholder ICS allows an optimal access and a perfect view even in posterior regions
- tipholder ICS and tip IC1 are both sterilisable and reusable

- IMPLANT CLEANING SET S

The set consists of a tipholder ICS, 1 torque wrench K10 and 5 tips IC1

ENDO FILES

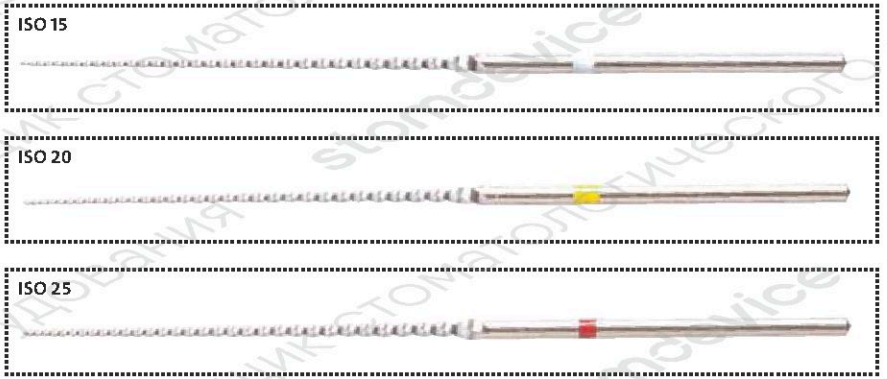

NITI-FILES FOR ULTRASONIC UNITS

27 MM LENGTH

https://stomdevice.ru - стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

stomdevice

mectron endo files allow a fast root canal preparation for the consequent tridimensional filling treatment.

The liquid irrigation activated by the ultrasonic system arises a double effect:
– the root canal disinfection allowed by a bactericidal effect thanks to the temperature increase of the irrigation liquid
– debris removal (smear layer) generated by an acoustic streaming outcome

→ 31 MM LENGTH

https://stomdevice.ru - стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

ENDO REVISION
WITH ER INSERTS

Exposure and removal of root pins, fast and effective removal of calcification in the coronal third of the root, removal of fractured root inserts – the ER inserts cover the complete spectrum of endodontic revision treatment.

ENDO RETRO INSERTS – MINIMALLY INVASIVE RETROGRADE ROOT CANAL PREPARATION

Endo retro inserts assure a satisfying solution to the root canal access issue. Their thin and 90° angled structure allows a conservative cut through a minimum wide bone window.

These advantages facilitate wound healing and spare the patient useless pain.

EXTRACTION INSERTS – EXCLUSIVE FOR UNITS WITH PULSE MODE

Even if the primary objective of dentistry is the preservation of natural teeth, sometimes extractions cannot be avoided. In these cases, maximum safety is the most important thing during treatment.

The specially shaped inserts ME1, ME2 and ME3 – with a blade thickness of only 0.35 mm – perfectly fulfill the anatomical demands of non surgical extractions. They offer maximum intra-operative sensitivity, allowing a great preservation of alveolar bone and periodontal tissues. Furthermore, the physiological solution guarantees maximum visibility thanks to the cavitation effect which leads to a temporary hemostasis of blood vessels.

CROWN PREP TIPS – ATRAUMATIC AND PRECISE

The crown prep tips are dedicated to the preparation and finishing of subgingival margins. Due to the particular morphology, the tip could be used in contact with the margin without damaging the surrounding soft tissues. The preparation margin could be positioned subgingivally giving more comfort to the patient.

The special shape of the tipholder allows an optimal view of the preparation field. The tipholder brings the crown prep tips to an elliptic movement and enables therefore a circular preparation of the tooth.

MECTRON TIP CARD

Ultrasonic inserts wear out the same as manual instruments. Regularly check your inserts by means of the erosion tip card. Whenever your inserts are shorter than the orange hatched line, their performance is 50% less than the initial one. Such inserts should be quickly replaced.
