MM-PASTE

Ring / Anneau

EN

Calcium Hydroxide with Barium Sulfate
INSTRUCTION FOR USE

Water Soluble Temporary Root Canal Filling Material

APPLICATIONS
- Exposed pulp in pulp capping and pulpotomy
- Leakage canal
- Apexification
- Formation of hard tissue barrier
- Root canal filling material

DIRECTIONS FOR USE
- Clean and dry it after preparing the root canal
- Set up a disposable tip in syringe and insert the ring provided for an easy re-direction of the tip
- Disinfect the disposable tip with ethanol
- Fill the canal completely by pushing the syringe plunger while withdrawing the tip slowly
- Clean any excess paste with a sterilized cotton pellet
- Remove the used tip, fix a new one and cover up

HOW TO USE ROTARY RING
- If in contact with air, content could be hardened, So it is necessary to cover a cap on the needle after use
- Putting a syringe into a rotary ring is more convenient to handle & Use the rotary ring as a wrench to tighten or loosen a tip

ADVANTAGES
- Easy cleaning and removal
- Excellent antibacterial effect and radiopacity
- Premixed paste in a convenient syringe
- Excellent accessibility to the root canal and prevention of cross-contamination

CONTENTS
- 2.2g paste in a syringe
- Disposable tips
- One ring rotator for the direction control of the tip

STORAGE
- Do not fill beyond the apex
- For dental use only
- Do not use in allergic person
- Keep the syringe caped at all times, when not in use
- Store in a dry and cool area to avoid drying or separation of the paste

SHELF LIFE
- 2 years from the manufacturing date

Use By
Batch Code
CE-Mark and identification number of notified body.
Product conforms to the essential requirements of the Medical Device Directive 93/42/EEC
Authorized representative in the EC
Consult operating instructions
