stomdevice

Features

01. Freedom from platform and simplicity of design

Mac & iPad

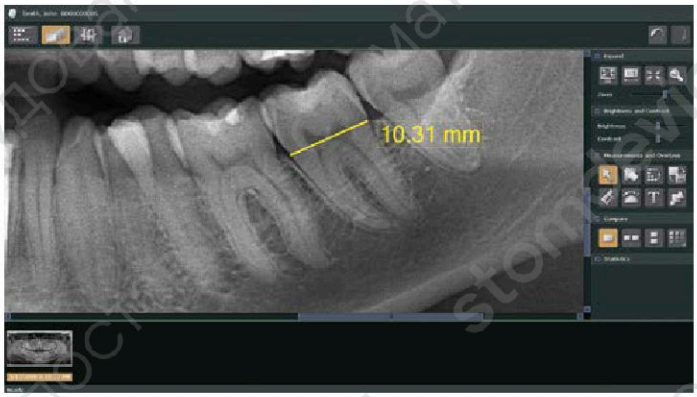

Windows

02. No software installation

With the latest advancements in web technology, i-Dixel Web gives you the freedom to view your images wherever you want and however you want. Gone are the days of complicated chair-side PC setups, and limited choices of hardware. Mac OS X and even iPads can be used to view and edit data from a Morita X-ray system.

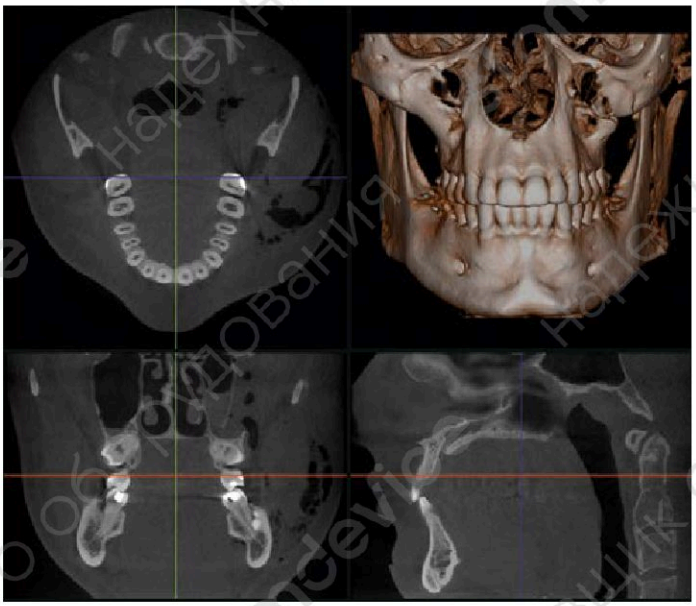

i-Dixel Web runs as a web service on an X-ray server PC included with your Morita X-ray system. It serves as a local and secure web-based dental image processing service that you can access throughout your practice on a wide range of devices.

This product supports Internet Explorer 11 on Windows 7 and Safari 7 on Mac OS X 10.9 and iPad (Retina type) on a client PC.

03. 3D image processing

Even though i-Dixel Web is a fully web-based system, the features you've come to expect are not compromised. View Morita's attractive 2D and even 3D images on the device of your choice!
