USA PFA AWARD

"Last October 9, 2010, Mr.curette was awarded Dental Industry Awards from PFA(The Pierre Fauchard Academy) Awards which was held on ADA(American Dental Association) 2010, in recognition of exceptional Bone Augmentation."

PFA & Dental Industry Award

The Pierre Fauchard Academy was organized in 1936. The founders of the Academy selected the name of Pierre Fauchard in memory of the French dentist who is recognized as the "Father of Modern Dentistry".

The Dental Trade and Industry Award of Recognition may be presented to honor an outstanding leader in the field for contributions to dentistry.

Past Winners

2010 MCT-MR.CURETTE, KOREA
2009 ACTEON COMPANY, FRANCE
2007 SULLIVAN-SCHEIN DENTAL INC.
2006 DENTSPLY, CANADA

About MCT-Mr.Curette Tech

MCT-Mr.Curette Tech is professional manufacturer to Implant surgical & Dental instrument. MCT-Mr. Curette Tech eastablished Research Center in Nov. 2008, And in collaboration development with celebrated dentist, manufacture new product for the convenience of dentist and make efforts in developing of new product which satisfy the needs of market.

At present, we exporting to more than 20 countries including the USA, England, China, Taiwan, Turkey, Iran, Egypt etc. Also we are participate in over 20 times international exhibition every year. We are received recognition as good quality product from many dentist and dental company which related implant.

New Bone Chip Maker with Stopper

BCM2
New Bone Chip Maker

Detail View

BCM2 New Bone Chip Maker

Bone collection greatly increased to more than 30%

Component

New Bone Chip Maker Tip

Ø3.4	Ø3.9	Ø4.2	Ø5.2
BCM2-01-01	BCM2-01-02	BCM2-01-03	BCM2-01-04

New Remover & Stopper

Bone Remover	Stopper-11.5mm	Stopper-10mm	Stopper-7mm	Stopper-5mm
BCM2-01-05	BCM-01-06	BCM-01-07	BCM-01-08	BCM-01-09

Character of Bone Chip Maker

1. Core blade attached to outer drill, makes it even more stable while drilling and more room for bone powders.
2. New BCM can be assembled stoppers, so you can make a hole as desired length.(World's First)
3. Can collect the bone powder at the same time while drilling and save cost for bone graft.
4. Cutting Power is excellent due to blade with Z shape.

Direction for Use

1. Join the stopper of desired size into Bone Chip Maker Tip.
2. Make a hole on the bone by Bone Chip Maker Tip.
3. Separate Tip from Hand-piece, and disassemble Bone Chip Maker Tip with Bone Remover.
4. Collect the bone out of inside of the drill with tale of the Bone Remover.
5. After Using, disinfect Bone Chip Maker Tip with Ultrasonic Clean & Autoclave

Fixture & Screw Remover Kit

FSRK-01
Fixture Screw Remover Kit

Fixture Remover Kit

1. Excellent combination of Remover and Trephine Bur
2. Trephine bur that can remove implant without bone loss.
3. One remover applicable to all sizes of implants
4. Solid durability

Screw Remover kit

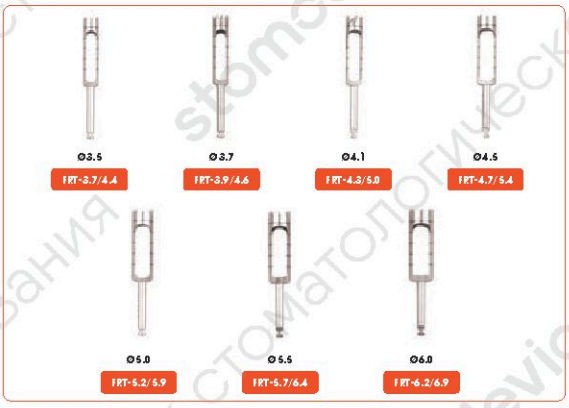

1. Pick certain guide for used abutment.
2. Attach the guide and hold it with guide holder.(SRG-H)
3. Use screw remover drill to make hold in the core of broken screw in reverse way.
4. Use Tap drill to remove the broken screw in reverse way.

Masai Drill II

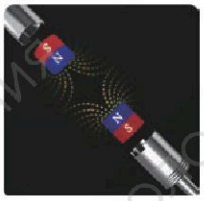

(Magnetic Sinus Artifical Intellgence Drill)

MAS2-01
Masai Drill II

Video / www.mrcurette.co.kr

Magnetic Drill

It is magnetic drill which delete maxillary bone without damage of sinus membrane.
Using Alnico Magnet which can bearable with 400°C, magnetic of drill is not change with autoclave temperature.

Character of Magnetic Drill – Three Kinds Safety devices

1. Blade of drill have groove in the diamond bar, safety and cutting force is excellent, and even though drill reach sinus membrance, membrance is not damaged.
2. Masai drill are tripped against sill which made by initial drill, and even if presssed at moment of bone punching, masai drill did not go through into the hole.
3. At the moment of bone punching, upper part of masai drill was separate from the Lower part by magnet force and stop operate. It can perceive by hand, also can confirm through separation of gear.

Component

Aqua Tip

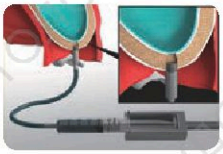

WSL-3.8	WSL-3.8
WSL-4.2	WSL-4.5

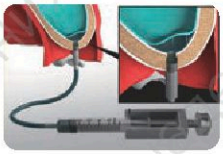

Aqua Tip

1. After making hole with Masai drill use aqua tip to lift up the membrane.
2. Engage the Aqua tip onto the hole.
3. Fill the syringe with saline water and join with hose.
4. Place the syringe into the roller and stick the hose with Aqua tip.
5. To lift up the membrane, turn the roller.

WSL-01
Hydro Lift System

Aqua Tip

1. Maxillary sinus membrane can be easily by hydrostatic pressure.
2. Various size of aqua tip(2.8 3.0 3.3 3.5 3.8 4.0)
3. Compatible to a variety of maxillary sinus elevation drill.
4. Sanitary membrane elevation due to use of a disposable syringe.
5. Because treatment of creastal approach is possible within 3mm in residual bone, the time and cost is reduced.
6. Desired amount of bone can be easily implanter.

Sinus Master II

SMK2-01
Sinus Master II

1. Maxillary bone can be drilled efficiently with Sinus Master Kit.
2. After measuring the cortical bone length, steadily approach with Crest Drill with stopper until last 1mm.
3. For the last 1mm, finish with Crest Reamer with 1mm Stopper joined. Drill mainly relies on the Diamond particles.
4. Use sinus lift instruments to lift up the sinus membrane.

BCT-01-01

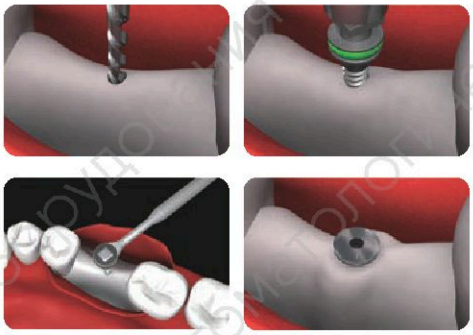

Direction for Use

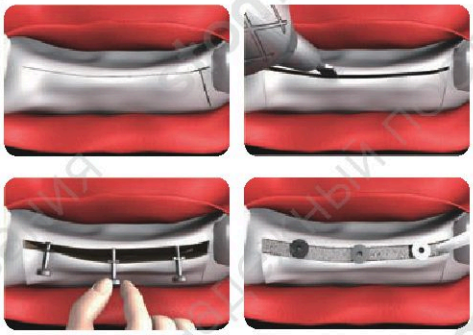

Bone Expander

1. Measure the thickness of bone where implant going to be placed.
2. Make a initial hole with Pilot Drill.
3. Expand the hole using the Bone Expander of desired size.
4. If the distance is too short to interfere with neighboring tooth, the distance can be extended by using extension tool.

Bone Crester

1. Split ridge bone lengthwise by the desired length using the saw.
2. Make it deep enough for spreader by using split chisels.
3. Put in more than 2 spreaders suitable to the length.
4. To expand the bone gradually, screw each spreaders little by little..

PRF-01-01

Bottom Board & Case
PRF-01-02 PRF-01-04

Character of PRF BOX

1. Prevent from infection by not using gauze
2. Can use Growth Factor which collected by PRF BOX while Bone Grafting. It is helpful for formation of bone.

Direction for Use

1. Draw 5cc blood from patients.
2. Extract PRF Gel by centrifuge.
3. Put the yellow part of PRF Gel. And press by press board.
4. Use PRF membrane which is detached from liquid.

Titanium Suction & Bone Collect Set

Titanium Suction Set

1. All Components can be sterilized.
2. It is processed by titanium to prevent static electricity and not to distrub healing up of implants.
3. This is a light suction line easy for long-term surgery.

SUT-01

TBC-02 Bone Collector Net

Titanium Bone Collector Set

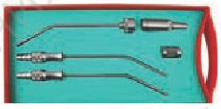

1. It can solve suction and bone collecting at one shot.
2. It is disinfect bone collector net, not a disposable bone collector net.

BOS-01 Bone Scraper(Straight)

TBC-02 Bone Collector Net

Titanium Suction & Bone Collector Set

Components:
Titanium Suction Tip 2EA,
Titanium Bone Collector Tip,
Bone Collector Net,
Suction line, Adapters.

Photo Contrast

It makes the photo background black uniformly to improve picturequality.

Impant Gauge / Ridge Mapping Gauge / Depth Gauge

Implant Gauge

Gauge to measure interval and length of implants.

GAU-03 Implant Gauge

Ridge Mapping Gauge

It can measure bone thickness without tissue incision.

GAU-04 Ridge Mapping Gauge

It can be conveniently read since the scale Mark is located in the back side.

Depth Gauge

DSG-01 Depth Gauge 1

DSG-02 Depth Gauge 2

Venus Gauge / Apollo Gauge / Gag Gauge

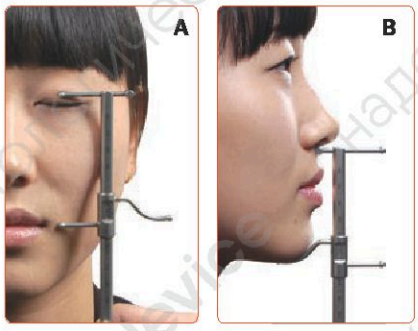

Venus Gauge / Apollo Gauge

It is used to measure tooth length of edentulos patients.
Accurate measurement is possible with anxiety non-provoking round end.

Venus Gauge
GAU-01

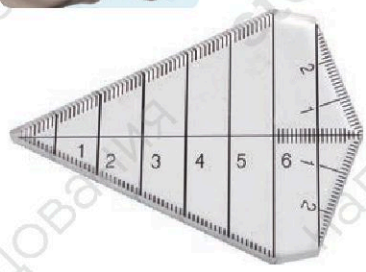

Apollo Gauge
GAU-02

In case of edentulos patients, by the difference in length between A and B can determine the thickness of block Arch and tooth size.

Gag Gauge

Gag Gauge
GAU-09

Zygoma Gauge / Castro Gauge

Zygoma Gauge

It can measure the between left and right face from the center.

GAU-06 Zygoma Gauge

Castro Gauge

GAU-07 Castro Gauge (Straight)

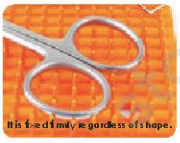

GAU-08 Castro Gauge (Curved)

GAU-10 Castro Gauge (Curved-Large)
