Shorter, Perfectly Balanced

Shorter, lighter and perfectly balanced, "nano series" instruments are designed to be natural extensions of the clinician's hand, ensuring smoother procedures. Even during implant operations that require delicate and precise movements, a "nano series" faithfully mirrors the user's intent. NSK continues to challenge the limits of manufacturing and pioneer next-generation contra-angles.

Smart Miniaturization Enables Perfect Balance

"nano series" preserves the high performance NSK contra-angles are known for, yet these new instruments are approximately 10 percent smaller and lighter than conventional models. In combination with the NLX nano micromotor nano Series gives you the same perfect balance and manoeuvrability as an air turbine, ensuring more accurate treatments. These next-generation contra-angles fit a wide variety of clinician's hands and will alter your perception of contra-angles as heavy and cumbersome.

Perfect Balance

Reducing size and weight shifts the center of gravity to an optimal position, dramatically reducing fatigue during procedures and improving your fingertip dexterity.

Smaller and Slimmer

nano95LS has smaller head and slimmer neck dimensions.

Outstanding Durability

The nano95LS gear shapes have been designed using High Spec 3D simulation software to achieve optimal results in terms of durability and noise level minimization. In addition, special DLC Coating (Diamond-Like-Carbon) is applied to the gears, dramatically increasing durability.

nano Series instruments are compatible with NSK motor line up (NLX nano, NLX plus, M40LED, NBX, NBX N, X205L, M205LG and SGL70M micromotors) and other motors with insert less than 23mm.
