Learning the smoothest digital workflow in dentistry

*We will help your dental school create a fully digital learning environment that provides a smooth transition from preclinical to clinical work. The next-generation **Planmeca Compact™ i Sim** simulation unit motivates your students to adopt ergonomic working habits right from the beginning of their studies and allows you to design your teaching area according to your specific needs.*

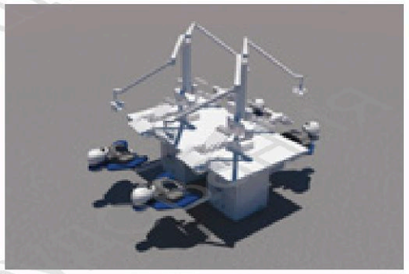

The best working habits from day one

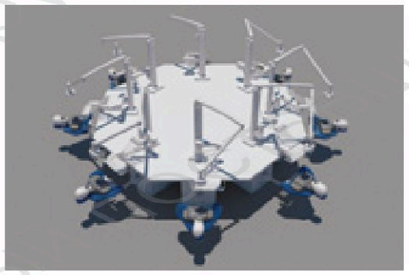

With **Planmeca Compact™ i Sim**, your students will adopt the correct working ergonomics and infection control routines from day one. By practicing on a real Planmeca dental unit in a lifelike environment, students will learn to master the smoothest digital workflow in dentistry.

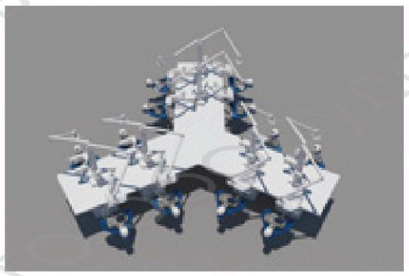

Modular design

The flexible and modular design of Planmeca Compact i Sim fits into any clinic layout and can be easily configured according to different user needs and purposes. This gives you the freedom to design your teaching area as you wish and to utilise different table surface shapes and sizes in your clinic design.

An upgradable and future-proof platform

The Planmeca Compact i Sim simulation unit is based on the **Planmeca Compact™** i technology platform, our most widely sold dental unit range with over 100,000 users worldwide. The platform-based solution can be easily upgraded with new features and functionalities at any time, making sure your investment is a safe and future-proof one.

Key features
