stomdevice

- Double-layer metal protection to the chamber
- Integrated vacuum technology
- Automatic platform lift mode
- Built-in error warning
- 2-Stage program to meet special sintering demands
- Temperature compensation
- Vacuum testing, cleaning, drying, and other maintenance procedures
- Unique, homogenoeous heat distrubition

Advantages

- Change the design of the furnace to increase insulation performance.It is more convenient to maintain the furnace wire.
- Double-layer meta protection design to furnace chamber, double-layer metal interlayer with independent vacuum path fou better thermal insulation performance.
- The furnace wire is protected by a quartz tube to extend service life and to heatevnly and effectively. The maximum load temperature of the furnace chamber is1150°C.

Device Parameters

Specification	Parameters
Dimensions	33*42*56cm
Weight	26.5kg
Voltage	220V 50Hz ± 10%
Heating Rate	10-100°C
Maximum Input Voltage	1200w+350w
Maximum Working Temperature	1150°C
Ultimate Vacuum Degree	<30mmhg
Constant Temperature Time	00:30-30:00min
Chamber Available Sizes	φ85x55(mm)
Waterproof Level	IPX1
Fuse	Fuse 1: 3.0A Fuse 2: 8.0A
