VDW®
ENDODONTIC SYNERGY

stomdevice

Accurate length determination – the foundation for successful endodontic treatments

1 Reliable

- Large projection of the apical section with unique visualization of the apical constriction
- Pre-calibrated display of the apical constriction area, no individual calibration necessary[1]
- Live representation of the file movement along the entire root canal

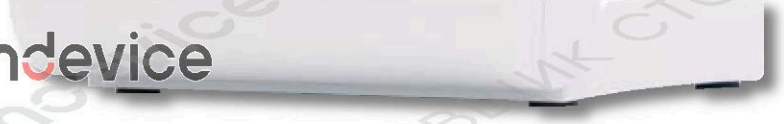

Reliable and accurate

2 Accurate

- Impedance measurement based on advanced multi-frequency system
- Latest digital technology

https://stomdevice.ru стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

User-friendly

- Foldable display adjusts to desired viewing angle
- Anti-slip casing with cable storage compartment
- Rechargeable AAA batteries
- Battery charger indicator
- Instruction CD-ROM included in kit

Patient-friendly

- Built-in demo mode for quick demonstration to patients
- Length measurement without radiation

Patient-friendly and safe

Safe

- Electronic length determination – safest method
  No more over-extended or under-extended root fillings
- Conventional radiography diagnostics – not reliable due to the 2D representation of a 3D root canal morphology

User-friendly

100% confident?

but 100% off target!

Raypex® 5 for successful endodontic treatments!
