Preparation

Easy root canal preparation

Benefit from a safe and easy root canal preparation and create optimal conditions for disinfection.
The result: full control from the start.

- Time-saving preparation of the entire root canal with only one **RECIPROC®** ***blue*** or **RECIPROC®** instrument.
- Minimum risk of fracture when used together with VDW drives, e.g. **VDW.CONNECT Drive®** or **VDW.GOLD®RECIPROC®**.
- Automatic stop on reaching the apex thanks to the apex locator.

RECIPROC® *blue*

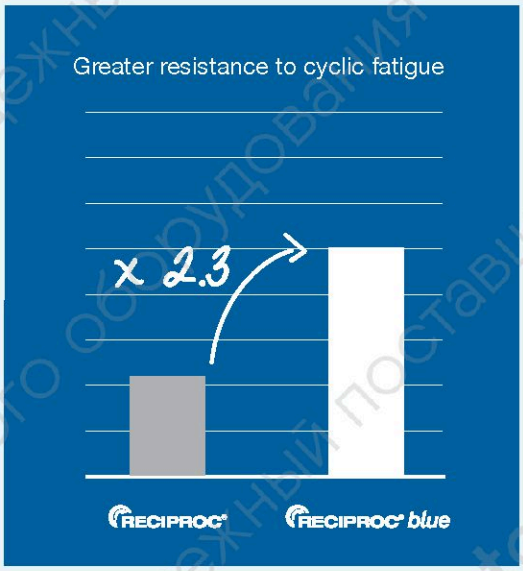

System designed specifically for root canal preparation in reciprocation - Root canal preparation with only one instrument.

- Same cutting efficiency as RECIPROC®
- Increased flexibility and safety compared to RECIPROC®
- Same simplicity of use as RECIPROC®

Simple, but effective: The latest RECIPROC® *blue* file generation combines the ease of the original RECIPROC® concept with enhanced safety in root canal preparation for patients. An innovative heat treatment makes RECIPROC® *blue* particularly flexible to ensure a smoother and safer progression in the canal and gives it its characteristic blue color.

VDW.ROTATE™

NiTi Root Canal File

Taking rotary preparation to the next level

- VERSATILITY: VDW.ROTATE™ includes an intuitive 3 file basic sequence plus a wide range of larger files for various clinical cases with matching paper points and obturators.
- RESPECT OF THE NATURAL CANAL ANATOMY: The instruments follow the natural canal anatomy smoothly thanks to its specific heat treatment making the file more flexible without compromising its cutting efficiency.*
- EFFICIENT DEBRIS REMOVAL: The adapted S cross section gives more space for debris removal and provides control of the instrument for a swift, thorough and safe preparation.*, **

FileCare® EDTA — 2 × 3 ml V04 1010 000 002

Chelating agent — 5 × 3 ml V04 1010 000 005

- Active substances: 15 % EDTA and 10 % carbamide peroxide gel
- Removes smear layer
- Improved tubular penetration of endodontic medication and filling material by better cleansing the canal and opening dentinal tubules*
- Easier penetration of the instrument, as FileCare®EDTA decalcifies dentine by binding the calcium in an electronegative complex
- Pulp tissue and dentinal debris are easily flushed out of the canal

*compared to using sodium hypochlorite irrigation singly

VDW.GOLD® RECIPROC®

Endo motor with integrated apex locator

- A market proven device you can rely on!
- High performance for rotary and reciprocating root canal preparation
- Perfect interplay in the RECIPROC® mode
- Supports an extensive range of rotary and reciprocating file systems
- Dr's Choice: store up to 15 individual torque and speed settings
- Battery-operated motor; maintains constant operation even during charging

- **RECIPROC REVERSE Comfort Function**:** two-stage indicator helps determine the right method of preparation
- Additional setting for root canals with difficult anatomy for rotary motion

ANA*: Reduction of torque limit during the preparation of canals with difficult anatomies

ASR*: Automatic reverse rotation when the set torque limit is reached

Irrigation

https://stomdevice.ru - стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

Efficient irrigation

Increase the likelihood of a successful root canal filling with efficient irrigation.
The result: maximum cleaning with minimum effort.

- The innovative sonic-powered **EDDY®** irrigation tip allows for highly effective cleaning of the entire root canal system.
- Residual tissue and debris are reliably removed, even in complex root canal anatomies.
- Thanks to the flexible polyamide material, the **EDDY®** tip is gentle on dentine with low risk of fatigue fracture.

https://stomdevice.ru - стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

EDDY®

Innovative sonic powered irrigation – safe, effective, proven

- Sonic powerd polyamide tip
- Powerful activation at max. 6,000 Hz via Airscaler
- Reliable removal of residual tissue and dentine chips
- Three-dimensional movement for irrigant activation
- Many studies substantiate the effectiveness of EDDY®

Cavitation
Due to the fast movement of the irrigating tip in the irrigant small gas bubbles form and then implode. The energy released intensifies the cleaning effect of the irrigant.

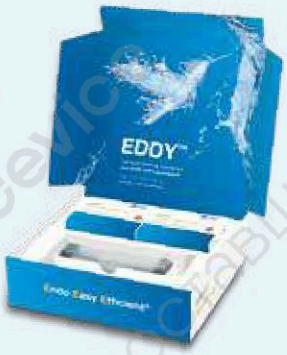

Acoustic Streaming
High frequency acoustic oscillation creates swirling eddies in the irrigant which strengthens the cleaning effect on the canal walls.

Obturation

Homogeneous 3D obturation

Achieve a homogeneous, wall-adapted obturation of the entire root canal system and minimise the risk of recontamination.
The result: a filling that delivers what it promises.

- The **GUTTAFUSION®** carrier system combines warm obturation with a convenient single-cone technique, thus setting new standards in thermoplastic obturation.
- Warm gutta-percha condenses into all isthmi and ramifications. The result is a homogeneous 3D filling.
- The obturation – which is made entirely of gutta-percha – is easy to remove.

GUTTAFUSION®
for RECIPROC® *blue*

System for 3-dimensional obturation after preparation with RECIPROC® *blue* or RECIPROC®. The use of Size Verifiers is not necessary as there are only three obturator sizes according to the RECIPROC® system.

Obturators made entirely of gutta-percha

On the inside, crosslinked polymer chains give stability to the carrier. On the outside, the carrier is coated with flowable gutta-percha. The carrier helps to condense the heated, flowable gutta-percha into the whole root canal system. The beneficial characteristics of gutta-percha are maintained.

Special handle design

The special handle design for tweezers allows precise placement of the obturator in the root canal. Stripping off gutta-percha can be avoided, especially in molars*.

Post-Endo

https://stomdevice.ru - стоматологическое и зуботехническое оборудование с доставкой по России и СНГ

Safe post-endo

Achieve even more safety in post-endodontic treatment by using root canal posts.
The result: the ideal prerequisite for long-term treatment success.

- **D.T. Light-Posts** are used for the fixation of filling material where remaining dental tissue is insufficient.
- The quartz fiber posts have a high level of bending strength, fracture resistance and excellent radiopacity.
- The double taper shape of **D.T. Light-Posts** helps to preserve as much dentine as possible while at the same time adapting easily to the shape of the prepared canal.

D.T. Light-Post Illusion X-RO

Quartz fiber post with thermally reactive color pigments

- Double Taper Design for preserving more dentin
- Easy identification of post size
- Improved control after placement
- Aesthetics: highly translucent at body temperature

Invisible in the tooth – but clearly visible during treatment:
Due to thermally reactive pigments, D.T. Light-Post Illusion X-RO made of quartz fiber are easily distinguishable from dentin when you need it – colored at room temperature (22°C) making it conveniently visible for placement and retreatment, but translucent at body temperature (37°C) for an aesthetically perfect tooth.

D.T. Light-Post Illusion X-RO Refill Blister Pack

- Individually packed for convenience
- 2 blister packs of 5 posts each
