ELITE SOFT RELINING PRIMER is a **bonding agent** between **ELITE SOFT RELINING** and the denture.

PREPARATION OF THE DENTURE

Remove completely the old existing relining. Grind off the denture base approximately 1-2 mm. Prepare at the vestibular, lingual resp. dorsal borders a shoulder of approximately 2-3 mm in height with a depth of minimum 1 mm. Round off the Borders. The surface to be relined must be roughened.

Clean the denture thoroughly. Traces of grease have to be removed by means of pure medical alcohol and let dry.

APPLYING ELITE SOFT RELINING PRIMER FOR ADHESION

Apply **ELITE SOFT RELINING PRIMER uniformly and completely** onto the grinded and cleaned denture areas to which the material has to adhere. Let the primer dry for approximately 1 minute. After use close the bottle immediately. Saliva, humidity or monomer liquids prevent the adhesion of **ELITE SOFT RELINING** to the denture base. Proceed with relining of the denture with **ELITE SOFT RELINING.** Refer to the instructions for use for **ELITE SOFT RELINING.**

STORAGE

Do not store above 25°C (77°F). Do not use after expiration date.

WARRANTY

DS Dental Supply GmbH warrants this product will be free from defects in material and manufacture. DS Dental Supply GmbH makes no other warranties including any implied warranty of merchantability or fitness for a particular purpose. User is responsible for determining the suitability of the product for user's application. If this product is defective within the warranty period, your exclusively remedy and DS Dental Supply GmbH's sole obligation shall be repair or replacement of the DS Dental Supply GmbH product.

LIMITATION OF LIABILITY

Except where prohibited by law, DS Dental Supply GmbH will not be liable for any loss or damage arising from this product, whether direct, indirect, special, incidental or consequential, regardless of the theory asserted, including warranty, contract, negligence or strict liability.
